

Bennettsbridge Mixed NS.

Administration of Medicines Policy

Introduction:

The policy was drafted through a collaborative school process involving the Board of Management, all staff members and parents.

Rationale:

The policy as outlined was put in place to;

- Clarify areas of responsibility
- To give clear guidance about situations where it is not appropriate to administer medicines
- To indicate the limitations to any requirements which may be notified to teachers and school staff
- To outline procedures to deal with a pupil with a nut allergy in our school
- Safeguard school staff that are willing to administer medication
- Protect against possible litigation.

Relationship to School Ethos:

This policy is in keeping with the school ethos through the provision of a safe, secure and caring school environment and the furthering of positive home-school links. . Teachers have a professional duty to safeguard the health and safety of pupils, both when they are authorised to be on the school premises and when they are engaged in authorised school activities elsewhere. The school promotes positive home-school contacts, not only in relation to the welfare of children, but in relation to all aspects of school life

Aims of this Policy:

- Minimise health risks to children and staff on the school premises
- Fulfil the duty of the BoM in relation to Health and Safety requirements
- Provide a framework within which medicines may be administered in cases of emergency or in instances where regularised self-administration has been agreed with parents/guardians

Please note:

1. No staff member is obliged to administer medicine or drugs to a pupil and any staff member willing to do so works under the controlled guidelines and authorisation of the school's Board of Management as outlined below.
2. It is advised that any child who shows signs of illness be kept at home.
3. Where possible, the parents should arrange for the administration of prescribed medicines outside of school hours.
4. Non-prescribed medicines or routine antibiotics will neither be stored nor administered to pupils in school.

School Procedures in Bennettsbridge Mixed NS. for the Administration of Medicine

- The Board of Management requests parents to ensure that teachers be made aware in writing of any medical condition suffered by any child in their class. This is done via Health/Medication section on the school Enrolment form when
 - a) enrolling their child in the school
 - b) when new medical conditions present at any point during the child's time in school

This does not imply a duty upon teachers personally to undertake the administration of medicines or drugs.

- If there are medical conditions present which necessitate the administration of medicines in school, parents will then be asked to complete the applicable sections of the attached form (Appendix 1). This form requests the Board of Management to authorise the taking of prescription medicine during the school day. The request must also contain clear written instructions of the procedures to be followed in administering the medication. The Board and members of the staff will seek indemnity from parents in respect of any liability arising from the administration of medicines.
- Where specific authorisation has been given by the Board of Management for the administration of medicine, the medicines must be brought to school by the parent/guardian or a designated adult. The Board of Management will provide storage facilities in the secretary's office for a small quantity of medication and if a child requires self-administering on a daily basis the BOM requests parents to store medication in school in this way. If this is not possible the parent/guardian or designated adult must bring in and collect medication on a daily basis to the class teacher. It is the responsibility of the parent/ guardian to ensure that all medication is delivered and collected in this way. All medication must be clearly labelled with child's name and must have exact details of how it is to be administered.
- Under no circumstances should children bring or store medication in their schoolbags, coats etc. Arrangements for the storage of certain emergency medicine, which must be readily accessible at all times must be made with the principal. Parents are responsible for the provision of medication, notification of change of dosage and replenishing when necessary in advance of best before dates.
- The school advocates the self- administration (e.g. inhalers) of medicine under the supervision of a responsible adult, exercising the standard of care of a prudent parent.
- In an emergency situation, qualified medical assistance will be secured at the earliest opportunity and the parents contacted
- A written record of the date and time of administration must be kept by the person supervising or administering it (Appendix 2 and Appendix 3)
- If going off-site, medication must be carried
- The BoM must inform the school's insurers accordingly
- All correspondence related to the above are kept in the school in the child's individual file, on the school Aladdin system, and in the Administration of Medicine Record Book.

- The school maintains an up to date register of contact details of all parents/guardians including emergency numbers. This is updated in September of each new school year. Parents are regularly requested to inform the school of any changes in contact details.
- Parents must inform the Board of Management in writing of any improvement or deterioration in their child's medical condition and the medication consequences thereof.

Long Term Health Problems

Where there are children with long-term health problems in school, proper and clearly understood arrangements for the administration of medicines must be made with the Board of Management. This is the responsibility of the parents/guardians. It would include measures such as self- administration under supervision of school staff, administration under parental supervision.

Life Threatening Condition

Where children are suffering from life threatening conditions, parents/guardians must clearly outline, in writing (Appendix 1: Emergency Procedure, Section 7), what should be done in a particular emergency situation, with particular reference to what may be a risk to the child. If emergency medication is necessary, arrangements must be made with the Board of Management. By signing the attached form (Appendix 1) parents indemnify the Board of Management and all staff members in respect of any liability that may arise regarding the administration of medication.

The following guidelines are in place with regard to pupils with a Nut Allergy

- Parents are asked to outline with particular reference to what may be a risk to the child.
- All parents of the child's class are informed of the allergy
- Depending on the severity of the allergy all nut products may be banned in that classroom
- Children and staff in the classroom are advised and reminded regularly not to offer or exchange foods, sweets, lunches etc.
- If going off-site, medication must be carried.
- **In the event the pupil comes in contact with peanuts the procedure outlined by parents will be followed**

Emergencies:

- **In the event of an emergency, procedure outlined by parents will be followed**
- Teachers should do no more than is necessary and appropriate to relieve extreme distress or prevent further and otherwise irreparable harm.
- Qualified medical treatment should be secured in emergencies at the earliest opportunity.
- Where no qualified medical treatment is available, and circumstances warrant immediate medical attention, designated staff members may take a child into Accident and Emergency without delay. Parents will be contacted simultaneously.

First Aid Boxes:

- A first aid box is stored safely in the secretary's office containing gauze, adhesive plasters, sterile eye pads, individually wrapped triangular bandages, safety pins, disposable sterile gloves, sterile water, anti-septic wipes, crepe bandages, cotton wool, Vaseline, diluted Savlon solution, warm/cold packs, vinegar, scissors etc.
- Three prepacked travel first aid kits are available for staff to bring for off-site activities.

Roles and Responsibilities:

- The BoM has overall responsibility for the implementation and monitoring of the school policy on Administration of Medication.
- The Principal is the day to day manager of routines contained in the policy with the assistance of the middle management structure and all staff members in the school.
- Parents should ensure that these procedures are clearly understood before submitting any request to the Board of Management.

Success Criteria:

The effectiveness of the school policy in its present form is measured by the following criteria;

- Compliance with Health and Safety legislation
- Maintaining a safe and caring environment for children
- Positive feedback from parents/teachers
- Ensuring the primary responsibility for administering medicine remains with parents/guardians

Ratification and Review:

This policy was ratified by the BoM on 12/3/2019. It will be implemented with immediate effect and reviewed as deemed necessary in the event of incidents or on the enrolment of child/children with significant medical conditions.
